

Meritor Part

Meritor Parts - The Meritor Business is a premier global dealer established upon 100 years of tradition of service and quality. Meritor focuses on integrated systems together with several modules and components to the original equipment makers and aftermarket equipment in the industrial and transportation trades.

Meritor values the needs of their clients to ensure their success while priding itself in the company's unique energy and believes this output of energy to be their competitive advantage in their global operations. Meritor starts with a philosophy that values diversity of people and their broad thought processes. Operating in 19 countries and employing over eleven thousand two hundred individuals, Meritor promotes collaboration and innovation amongst a team of experienced experts.

By just hiring future focused workers, Meritor strongly feels these top-caliber people would be able to quickly adapt to changing environments and demonstrate the performance and commitment required so as to reach results in the competitive materials handling trade. The company empowers their teams to make sound business decisions to be able to enhance the overall success of the business. In return, Meritor provides all their workers various chances for personal and professional development.

The Advanced Engineering team is on the forefront of systems engineering and components. This includes axles, drivelines, suspension and braking systems used for medium and heavy duty trucks, off-highway vehicles, buses, military vehicles and trailers. The Meritor Advanced Engineering team is developing. They launched a new technical center in Bangalore, India in September 2009 in order to lead their advanced product development initiatives which represent the whole Asia Pacific region. This team is likewise responsible for supporting the needs of their international engineering staff.

The Quality team at Meritor is a dynamic and customer-focused group who is devoted to ensuring optimum development at their aftermarket distribution facilities and production plant that are situated on 5 continents and in 19 nations.

They have their supplier network that is specially located to support the development of the business. Every regional team has globally supported quality systems, initiatives and centralized in Materials Engineering and Six Sigma. Meritor's growing Six Sigma program promotes a fact-based, data-driven method to decision making within each part of the company. The DFSS or also referred to as Design for Six Sigma ensures product reliability within each region. The team is even comprised of transactional Green Belts who use Six Sigma tools to business processes and apply lean techniques.
