

Aerial Work Platforms

Aerial Work Platforms - There are a variety of forklift attachments accessible on the market. They can help transform your forklift so that you could expand your ability to pick items up or finish clean up tasks and material handling with out difficulty.

Several accessories were specifically meant for the blades themselves. For instance, fork extensions could be utilized whenever you require much more blade length, which increases lifting capacity. Fork extensions come in lengths varying from forty eight to one hundred twenty inches. Triangular or rounded accessories are one more type used if transferring rolled material in order to ensure it does not roll off of the traditional flat forks.

Lifting accessories could be pivoting and telescoping crane attachments. They are available in many styles. These attachments are often used for transporting lumber, metal bars, poles or any sort of bulky things. Other attachments like other styles of hooks and hook plates are offered to be able to lift things making use of a sling or chain. Magnetic lifters and slab lifters are other items which can be used along with hook attachments. Slab lifters are specialized accessories that are intended for picking up various materials which are delivered in a slab or sheet format. Rug rams or carpet poles are other lifting tools that attach to your forklift in order to make transferring rolls of carpet much easier. The attachment hooks onto the lift truck's blades and has a pole which goes through the middle of the carpet roll.

There are many types of forklift attachment intended for facility maintenance like for instance snow forks. These industrial forks can be attached to front end loaders and designed for transferring materials such as snow, dirt as well as mulch. Other common cleanup accessories comprise magnetic sweepers and standard sweepers. Standard sweepers comprise a broom which the forklift blades hook onto for sweeping large spaces like for example warehouse, factory floors and parking lots. The magnetic sweeper is the same except that it has a magnetic plate instead of bristles. The magnetic sweeper is utilized in places where there is lots of metal debris like on shop floors for example. Sweepers have widths as much as 60 inches and this surface area makes clean up quick and easy.

Material spreaders are other accessories utilized on lift trucks. These spreaders are useful for a variety of applications such as spreading seeds, ice melt, rock salt, pellets, fertilizers and insecticides.

Work platforms are another optional lifting accessory that many businesses use everyday. The platforms range in size from 36" x 36" to up to 60" x 60". There are several models existing which are capable of folding up and storing into a smaller space. Work platforms are designed to raise workers up to an overhead location using the lift truck. Larger platform models have added space for workers to bring tools and other essential things meant for the job. Often work platforms are constructed of steel or ploy material.
